

Dear Colleagues,

On behalf of the organizers of the Conference, I have honour and great pleasure to invite you to participate in the 10th Scientific Conference "Baltic Morphology" in Kaunas, from 24 - 25 October, 2019. The Lithuanian University of Health Sciences has previously hosted the 5th "Baltic Morphology" Conference in 2009 and, exactly ten years later, the University of Health Sciences will again be delighted to welcome the 10th "Baltic Morphology" Conference. This forum of the Baltic morphologists with numerous participants from the neighbouring countries takes place traditionally every two years in Estonia, Latvia and Lithuania on a rota basis.

The Conference Scientific Program will reflect the considerable range of interests of the disciplines of Morphology, including the Morphology Sciences Education. Certainly, this meeting will provide the opportunity for the attendees to exchange views and ideas, to discuss their observations and interpretations as well as the most recent discoveries in diverse fields of morphology.

Apart from a very interesting scientific program, the venue of the meeting, Kaunas city, offers a wide range of attractions: history, museums, galleries, theaters, a delicious cuisine and friendly atmosphere! If participants can stay longer than the Conference, Kaunas is also excellent base from which to explore other parts of the Republic of Lithuania as this city is located almost in the geographic center of Lithuania and has excellent network of roads linked with other cities of the Republic, including the capital Vilnius.

You are kindly asked to make a resolve to participate in the Conference and to submit your presentation abstracts until **July 2, 2019**. Accepted abstracts of presentations, both the oral and the poster ones, will be published in a supplement of Medicina (Kaunas) journal and, thereby, they will be far and wide visible.

I am looking forward to greeting you to the 10th "Baltic Morphology" Conference in Kaunas in 2019!

Courteously,

Dainius Haroldas Pauza, PhD
Head and Professor
Institute of Anatomy, Faculty of Medicine
